

# Revealed: Winners of the IW Investment Research Awards

Inaugural awards this week

**The winners for the inaugural Investment Week Investment Research Awards have been announced, in categories including Best Ratings and Research Service and Best Investment Trust Research.**

Investment research is an integral part of the asset management industry. Having up-to-date, reliable, good quality company and economic research that is both relevant and thorough can help expand and deepen the pool of investment opportunities.

This is particularly important for the growth of small- to mid-sized companies, which can suffer due to a lack of good quality research ideas.

The new regulatory focus on cost transparency in the investment research sector and changing economic landscape is beginning to drive a shift towards providers favouring research solutions that are more relevant and aligned to customers' needs.

Our inaugural Investment Research Awards are designed to celebrate that move towards services offering innovation, engagement, clarity and transparency.

The awards were presented at a special ceremony in London on 4 October. For more information on the awards click [here](#).
